

MARCH 2010

Quarterly Update

MAKE **YOUR DATA**
WORK FOR **YOU**
WITH SOFTWARE
CREATED FOR
YOUR BUSINESS

WELCOME TO OUR **FIRST QUARTERLY E-NEWSLETTER FOR 2010**

It has been a busy start to 2010 for ABC Software Ltd, with a new project completed in Australia, a 'first' to be signed up for a connection to a high speed digital broadband network and most importantly the first ABC baby has arrived!

Full speed ahead!

ABC is all set to provide faster connectivity to our customers by becoming the first business to join up with Unison Fibre's new ultra fast broadband network. We have moved to the FX network which will greatly improve the speed in which we can provide remote support, resulting in less cost for our customers and ease of use for your staff. Even if you are still a copper receiver, the speed will be improved. If you have fibre connected already, then it will be like lightening!

Our ongoing goal is to continually improve our service to you, and this step is just another step in the right direction for us all.

PAT goes 'live' in Mildura

January saw the successful roll-out of PAT (Packing and Traceability system) for Seven Fields' table grape operation in Mildura, Victoria. PAT manages the fruit from vineyard to market. Scanning of incoming and outgoing fruit brings efficiency and accuracy, whilst comprehensive reporting

means that key information is available at the press of a button. It has been a pleasure to work with such a fabulous client and to deliver another system that makes our clients' job easier!

Hands on approach

Clare McMahon from Seven Fields pictured scanning grape tray labels. Usually this lovely lady is in a suit and operates in the corporate world. Here she is testing out our application.

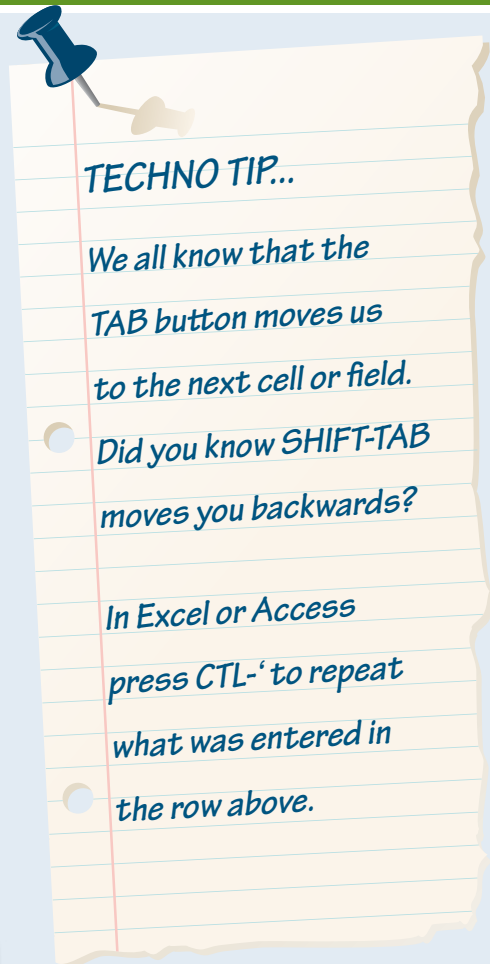

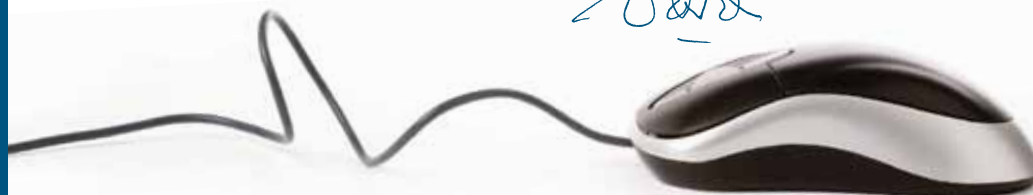

First ABC baby born

Big congratulations to Lee and Sean whose baby girl, Emma Louise was born on Sunday 21 February.

Regards

A handwritten signature in blue ink that reads "Steve".
